

# FTSE Global Equity Index Series

Data as at: 30 May 2025

The FTSE Global Equity Index Series covers around 7,400 securities in 47 different countries and captures 98% of the world's investable market capitalisation - covering every equity and sector relevant to international investors' needs.

The index series is divided into Developed, Advanced Emerging and Secondary Emerging segments, enabling investors to develop their own investable universe. Its highly modular nature provides the maximum breadth of options for structuring portfolios, with indices calculated at regional, national and sector level. Investors can then select on a size level, from the all-encompassing FTSE Global All Cap Index Series (large/mid/small cap), FTSE All-World Index Series (large/mid cap) or single size indices (large, mid or small cap).

Here we demonstrate the performance and characteristics of five of the leading global benchmark indices within the family - FTSE Global All Cap, FTSE Global Small Cap, FTSE All-World, FTSE Developed and FTSE Emerging.

See [www.ftse.com](http://www.ftse.com) for factsheets covering the leading regional indices within the series.

## 5-Year Performance - Total Return

## Performance and Volatility - Total Return

Index (USD)	Return %						Return pa %*		Volatility %**

\* Compound annual returns measured over 3 and 5 years respectively

\*\* Volatility – 1YR based on 12 months daily data. 3YR based on weekly data (Wednesday to Wednesday). 5YR based on monthly data

## FEATURES

### Coverage

98% of the world's investable market capitalisation across Developed and Emerging markets.

### Objective

Indexes within the FTSE Global Equity Index Series are designed for the creation of a broad range of financial products, such as index tracking funds, derivatives and Exchange Traded Funds (ETFs), and as performance benchmarks.

### Investability

Stocks are selected and weighted to ensure that the index is investable.

### Liquidity

Stocks are screened to ensure that the indexes are tradable.

### Transparency

The indexes use a transparent, methodologies-based construction process. Index methodologies are freely available on the FTSE Russell website.

### Availability

Indexes within the FTSE Global Equity Index Series are calculated based on price and total return methodologies, both real time and end of day. Net of tax indexes are also available in many instances.

### Industry Classification Benchmark (ICB)

Index constituents are categorized in accordance with the Industry Classification Benchmark (ICB), the global standard for industry sector analysis.

No member of LSEG nor their respective directors, officers, employees, partners or licensors provide investment advice and nothing in this document should be taken as constituting financial or investment advice. No member of LSEG nor their respective directors, officers, employees, partners or licensors make any representation regarding the advisability of investing in any asset or whether such investment creates any legal or compliance risks for the investor. A decision to invest in any such asset should not be made in reliance on any information herein. Indices and rates cannot be invested in directly. Inclusion of an asset in an index or rate is not a recommendation to buy, sell or hold that asset nor confirmation that any particular investor may lawfully buy, sell or hold the asset or an index or rate containing the asset. The general information contained in this publication should not be acted upon without obtaining specific legal, tax, and investment advice from a licensed professional.

Past performance is no guarantee of future results. Charts and graphs are provided for illustrative purposes only. Index and/or rate returns shown may not represent the results of the actual trading of investable assets. Certain returns shown may reflect back-tested performance. All performance presented prior to the index or rate inception date is back-tested performance. Back-tested performance is not actual performance, but is hypothetical. The back-test calculations are based on the same methodology that was in effect when the index or rate was officially launched. However, back-tested data may reflect the application of the index or rate methodology with the benefit of hindsight, and the historic calculations of an index or rate may change from month to month based on revisions to the underlying economic data used in the calculation of the index or rate.

No part of this information may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without prior written permission of the applicable member of LSEG. Use and distribution of LSEG data requires a licence from LSEG and/or its licensors.
