

FTSE Total China Connect Index

Data as at: 31 October 2024

The FTSE Total China Connect Index is designed to represent the performance of large and mid cap Chinese companies listed in or outside the People's Republic of China (PRC). The index reflects a broad China equity opportunity set available to international investors, and covers all major Chinese share classes including A Shares, B Shares, H Shares, Red chips, P Chips, S Chips and N Shares. The A Share constituents are determined by the shares available to international investors through the Northbound China Stock Connect Scheme.

Price, Total Return and Net of Tax Indexes are calculated in real-time on an intra-second streaming basis in offshore Renminbi (CNH).

Details of the Chinese share class definitions are described at the end of this document.

The China-Hong Kong Stock Connect program allows international investors to trade China A Shares listed on both the Shanghai Stock Exchange and the Shenzhen Stock Exchange via the Hong Kong Stock Exchange. Unlike the QFII and RQFII schemes, the program is open to both institutional and retail international investors.
