

FTSE All-World ex Fossil Fuel Reserves Index Series

Data as at: 30 May 2025

Market participants are increasingly looking to manage carbon exposure in their investments, and reduce write-off or downward revaluation risks associated with stranded assets. Stranded assets are fossil fuels deposits, including oil, gas and coal, that must remain unburned or in the ground in order for the world to avoid the worst impacts of climate change.

The FTSE All-World ex Fossil Fuel Reserves Index Series is a capitalisation-weighted index designed to represent the performance of constituents of the FTSE All-World Index after the exclusion of companies that have a certain revenue and/or reserve exposure to fossil fuels.
