FTSE Emerging ESG Index

Data as at: 30 September 2026

The FTSE Emerging ESG index is designed to align investment and ESG objectives into a broad benchmark, whilst maintaining industry neutrality. Company weights within the Index are "tilted" using FTSE Russell's ESG Ratings and subsequently, industry neutral re-weighting is applied so that the industry weights in the Index match the underlying index universe. As a result, the FTSE Emerging ESG index has risk/return characteristics similar to the underlying universe with the added benefit of improved ESG metrics.
