

FTSE Environmental Technology

The FTSE Environmental Technology Index Series measures the performance of companies globally whose core business is in the development and deployment of environmental technologies as defined by the FTSE Green Revenues Classification System (GRCS). These include Energy Generation, Energy Equipment, Energy Management and Efficiency, Environmental Resources, Environmental Support Services, Water Infrastructure and Technology, Waste and Pollution Control, Food and Agriculture, Transport Solutions, and Transport Equipment. Forming part of the overall FTSE Environmental Markets Index Series, the FTSE Environmental Technology Index Series requires companies to have at least 50% of their revenues derived from environmental products and services with clear and significant impact.

The FTSE Environmental Markets Index Series has been developed in collaboration with Impax Asset Management and under the direction of the independent FTSE Green Industries Advisory Committee. The FTSE Environmental Technologies Index Series includes the FTSE ET50 Index and the FTSE ET100 Index, which, respectively, comprise the 50 and 100 largest pure play companies globally, by full market capitalisation. The indices are designed to measure the performance of companies that have a core business in the development and operation of environmental technologies.
