

Data as at: 28 November 2025

# FTSE RAFI™ Emerging Index

FTSE partners with Research Affiliates on the FTSE RAFI Index Series. Index constituents are weighted using a composite of fundamental factors, including total cash dividends, free cash flow, total sales and book equity value. Prices and market values are not determinants of the index weights. Consequently the indices are less prone to excessive concentration arising from market fads, which can result in over-exposure to individual companies, sectors or countries.

The FTSE RAFI Emerging Index comprises 350 companies with the largest RAFI fundamental scores selected from the FTSE Emerging All Cap Index.

#### 5-Year Performance - Total Return

# **Performance and Volatility - Total Return**

Drawdown - based on daily data

## **FEATURES**

## Coverage

Companies with the top 350 RAFI fundamental scores, selected from FTSE Emerging All Cap Index.

#### **Objective**

The index is designed for use in the creation of a range of financial products, including index-linked funds, ETFs and over-the-counter (OTC) products.

#### Liquidity

Stocks are screened to ensure that the index is tradable.

#### **Transparency**

Index methodologies are freely available on the FTSE Russell website.

## **Availability**

The index is calculated based on price and total return methodologies.

## **Industry Classification Benchmark (ICB)**

Index constituents are categorized in accordance with the Industry Classification Benchmark (ICB), the global standard for industry sector analysis.

#### Methodology

See www.ftserussell.com for a full explanation of the FTSE RAFI methodology.

<sup>\*\*</sup> Volatility – 1YR based on 12 months daily data. 3YR based on weekly data (Wednesday to Wednesday). 5YR based on monthly data

Index returns shown may not represent the results of the actual trading of investable assets. Certain returns shown may reflect back-tested performance. All performance presented prior to the index inception date is back-tested performance. But is hypothetical. The back-test calculations are based on the same methodology that was in effect when the index was officially launched. However, back-tested data may reflect the application of the index methodology with the benefit of hindsight, and the historic calculations of an index may change from month to month based on revisions to the underlying economic data used in the calculation of the index.
