

FTSE BIVA Index

Data as at: 31 March 2025

The FTSE BIVA Index is designed to reflect the performance of liquid Mexican companies, which are constituents of the FTSE Mexico All Cap Index. Using the FTSE Global Equity Index Series (GEIS) as a base, the FTSE BIVA Index applies a higher liquidity threshold to achieve accurate and investable universe coverage while maintaining consistency and integrity. Index constituents are weighted by market capitalization, and each security is tested for liquidity at the semi-annual index reviews in March and September.

Through the FTSE BIVA Index, FTSE Russell provides the insights and tools necessary for investors to gain an accurate view into the most liquid tier of the Mexican market, providing investors with an easily understandable framework for analyzing equity portfolios and managing funds based on active or passive mandates. The FTSE BIVA Index is suitable for benchmarking purposes and as tools in the creation of a wide variety of financial products, such as index-linked funds, exchange traded funds (ETFs) and derivatives contracts. Real time and end of day data is available from Bloomberg (FTBIVA) and Thomson Reuters (.FTFTBIVA). Price, total, and net of tax values are available for the Index.

10-Year Performance - Total Return

Performance and Volatility - Total Return

Index (MXN)	Return %						Return pa %*		Volatility %**		
	3M	6M	YTD	12M	3YR	5YR	3YR	5YR	1YR	3YR	5YR

FEATURES

Objective

The index is designed for use in the creation of index tracking funds, derivatives and as a performance benchmark.

Investability

Stocks are free-float weighted to ensure that only the investable opportunity set is included within the index.

Liquidity

Stocks are screened to ensure that the index is tradable.

Transparency

The indexes use a transparent, methodologies-based construction process. Index methodologies are freely available on the FTSE Russell website.

Availability

The index is calculated based on price and total return methodologies.

Industry Classification Benchmark (ICB)

Index constituents are categorized in accordance with the Industry Classification Benchmark (ICB), the global standard for industry sector analysis.

Return/Risk Ratio and Drawdown - Total Return

The user of the information assumes the entire risk of any use it may make or permit to be made of the information.

No responsibility or liability can be accepted by any member of LSEG nor their respective directors, officers, employees, partners or licensors for (a) any loss or damage in whole or in part caused by, resulting from, or relating to any inaccuracy (negligent or otherwise) or other circumstance involved in procuring, collecting, compiling, interpreting, analysing, editing, transcribing, transmitting, communicating or delivering any such information or data or from use of this document or links to this document or (b) any direct, indirect, special, consequential or incidental damages whatsoever, even if any member of LSEG is advised in advance of the possibility of such damages, resulting from the use of, or inability to use, such information.

No member of LSEG nor their respective directors, officers, employees, partners or licensors provide investment advice and nothing in this document should be taken as constituting financial or investment advice. No member of LSEG nor their respective directors, officers, employees, partners or licensors make any representation regarding the advisability of investing in any asset or whether such investment creates any legal or compliance risks for the investor. A decision to invest in any such asset should not be made in reliance on any information herein. Indices and rates cannot be invested in directly. Inclusion of an asset in an index or rate is not a recommendation to buy, sell or hold that asset nor confirmation that any particular investor may lawfully buy, sell or hold the asset or an index or rate containing the asset. The general information contained in this publication should not be acted upon without obtaining specific legal, tax, and investment advice from a licensed professional.

Past performance is no guarantee of future results. Charts and graphs are provided for illustrative purposes only. Index and/or rate returns shown may not represent the results of the actual trading of investable assets. Certain returns shown may reflect back-tested performance. All performance presented prior to the index or rate inception date is back-tested performance. Back-tested performance is not actual performance, but is hypothetical. The back-test calculations are based on the same methodology that was in effect when the index or rate was officially launched. However, back-tested data may reflect the application of the index or rate methodology with the benefit of hindsight, and the historic calculations of an index or rate may change from month to month based on revisions to the underlying economic data used in the calculation of the index or rate.
