

MFGAM Core Infrastructure Index (MCII)

Data as at: 31 July 2025

The MFGAM Core Infrastructure Index (MCII) aims to provide institutional investors with an exposure to a portfolio of infrastructure companies that derive their earnings from assets that meet strict criteria for infrastructure definition. It is the view of MFGAM that core infrastructure assets should have a structural ability to generate earnings that are robust through the economic cycle and that there should be a structural linkage of those earnings to inflation. The index has been developed to include stocks that meet a series of rules designed to ensure they meet these criteria.
