

FTSE Taiwan High Dividend Low Volatility Index

Data as at: 31 March 2026

The FTSE High Dividend Low Volatility Index Series is designed to represent the performance of stocks exhibiting characteristics of high dividend yield and low volatility. The constituents of the underlying universe are ranked in descending order by trailing 12 month dividend yield. The top 60 form the index. Constituents are weighted by investable market capitalisation at each annual review.

The FTSE Taiwan High Dividend Low Volatility Index is a market capitalisation weighted index designed to measure the performance of the 40 least-volatile high dividend-yielding stocks within the universe of the FTSE TWSE Taiwan 50 and the FTSE TWSE Mid-Cap 100 Indices with investability adjustments applied. To ensure diversification the weight of each constituent is capped each quarter such that the maximum individual company weight does not exceed 10%.

10-Year Performance - Total Return

Performance and Volatility - Total Return

Index (TWD)	Return %						Return pa %*		Volatility %**		
	3M	6M	YTD	12M	3YR	5YR	3YR	5YR	1YR	3YR	5YR
FTSE Taiwan High Dividend Low Volatility	1.6	3.2	1.6	8.9	56.7	84.8	16.1	13.1	16.6	15.3	12.8
FTSE TWSE Taiwan 50	10.7	27.3	10.7	72.1	158.3	151.0	37.2	20.2	28.0	23.3	21.6

FEATURES

Objective

The index is designed for use in the creation of a range of financial products, including index-linked funds, ETFs, and over-the-counter (OTC) products.

Investability

Stocks are free-float weighted to ensure that only the investable opportunity set is included within the index.

Liquidity

Stocks are screened to ensure that the index is tradable.

Transparency

The indexes use a transparent, methodologies-based construction process. Index methodologies are freely available on the FTSE Russell website.

Availability

The index is calculated based on price and total return methodologies.

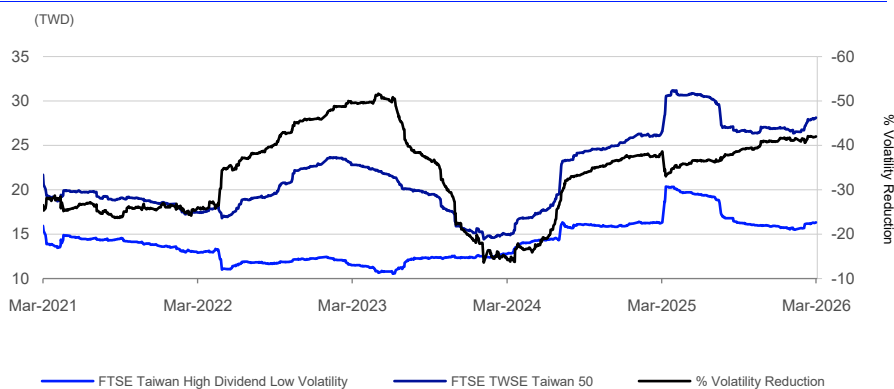

Industry Classification Benchmark (ICB)

Index constituents are categorized in accordance with the Industry Classification Benchmark (ICB), the global standard for industry sector analysis.

Dividend Yield

Annualised Rolling 252 Day Volatility

Return/Risk Ratio and Drawdown - Total Return

The user of the information assumes the entire risk of any use it may make or permit to be made of the information.

No responsibility or liability can be accepted by any member of LSEG nor their respective directors, officers, employees, partners or licensors for (a) any loss or damage in whole or in part caused by, resulting from, or relating to any inaccuracy (negligent or otherwise) or other circumstance involved in procuring, collecting, compiling, interpreting, analysing, editing, transcribing, transmitting, communicating or delivering any such information or data or from use of this document or links to this document or (b) any direct, indirect, special, consequential or incidental damages whatsoever, even if any member of LSEG is advised in advance of the possibility of such damages, resulting from the use of, or inability to use, such information.

No member of LSEG nor their respective directors, officers, employees, partners or licensors provide investment advice and nothing in this document should be taken as constituting financial or investment advice. No member of LSEG nor their respective directors, officers, employees, partners or licensors make any representation regarding the advisability of investing in any asset or whether such investment creates any legal or compliance risks for the investor. A decision to invest in any such asset should not be made in reliance on any information herein. Indices and rates cannot be invested in directly. Inclusion of an asset in an index or rate is not a recommendation to buy, sell or hold that asset nor confirmation that any particular investor may lawfully buy, sell or hold the asset or an index or rate containing the asset. The general information contained in this publication should not be acted upon without obtaining specific legal, tax, and investment advice from a licensed professional.

Past performance is no guarantee of future results. Charts and graphs are provided for illustrative purposes only. Index and/or rate returns shown may not represent the results of the actual trading of investable assets. Certain returns shown may reflect back-tested performance. All performance presented prior to the index or rate inception date is back-tested performance. Back-tested performance is not actual performance, but is hypothetical. The back-test calculations are based on the same methodology that was in effect when the index or rate was officially launched. However, back-tested data may reflect the application of the index or rate methodology with the benefit of hindsight, and the historic calculations of an index or rate may change from month to month based on revisions to the underlying economic data used in the calculation of the index or rate.
