

FTSE/JSE Shareholder Weighted Indices

Data as at: 30 June 2025

The FTSE/JSE Africa Index Series is designed to represent the performance of South African companies, providing investors with a comprehensive and complementary set of indices, which measure the performance of the major capital and industry segments of the South African market.

Shareholder Weighted (SWIX) Indices are each based on an existing FTSE/JSE market capitalisation weighted index. However all constituents are down-weighted in the SWIX indices by applying an alternate free float, called the SWIX free float. The SWIX free float represents the proportion of a constituent's share capital that is held in dematerialised form and registered on the South African share register. Headline and sector indices are available.
