

FTSE 350 Domestic and Global Exposure Indices

Data as at: 30 June 2025

The FTSE Domestic and Global Exposure Index Series is designed to reflect the performance of securities exhibiting either relatively high domestic or global sales respectively. Constituents are selected by the ratio of domestic/global sales to total sales and weighted by market capitalisation. The index series also includes "Pure" versions of selected Indices that aim to have higher sales exposure to their respective market. The index series reduces concentration by limiting ICB industries and constituent weightings.

The FTSE 350 ex Inv Trust Index forms the constituent selection universe of the FTSE 350 Domestic Exposure and the FTSE 350 Global Exposure Indices.
