

# FTSE Multi-Asset Composite Index Series

## FTSE Emerging + FTSE Emerging Markets Government Bond Indices

### Multi-Asset | Multi-Currency

The FTSE Multi-Asset Composite Index Series is designed to measure cross-asset market returns for a range of regions and risk exposures. Each index is constructed as an index-level composite of at least one broad-market equity and one fixed income index. Some indices also include a cash component. Each family within the series includes a selection of weighting ratios to proxy a range of asset class allocations.

Each series is produced in four weightings as standard: 80/20, 60/40, 50/50, 30/70 (Equity % / Fixed Income %). Versions inclusive of cash are also available, with cash weighted at 2% as standard. Composite index weightings are reset monthly, whilst underlying indices retain their respective rebalance schedules. Reporting is across four major currencies (USD, EUR, GBP, JPY). These indices are fully customisable on request.

### Underlying Indices

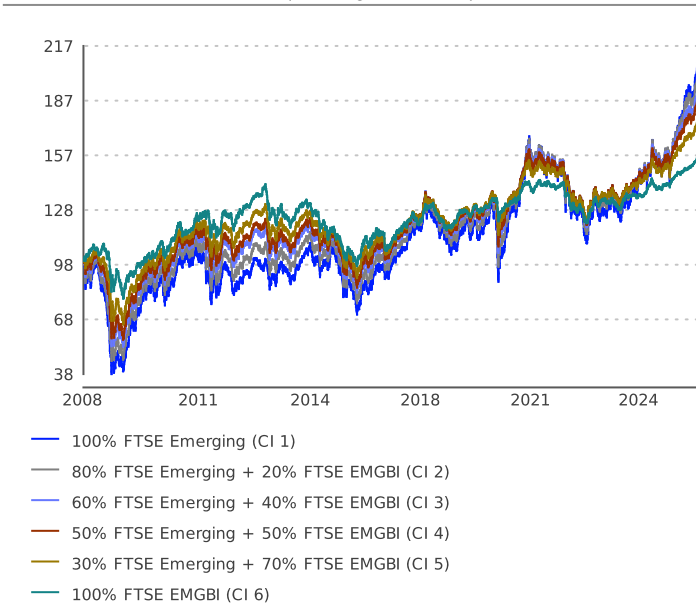

The FTSE Emerging Markets indices are part of the FTSE Global Equity Index Series (GEIS). The series includes large and mid cap securities from advanced and secondary emerging markets, classified in accordance with FTSE's transparent Country Classification Review Process. The FTSE Emerging Index provides investors with a comprehensive means of measuring the performance of the most liquid companies in the emerging markets.

The FTSE Emerging Markets Government Bond Index (EMGBI) comprises local currency government bonds from fourteen countries, providing a broad benchmark for portfolio managers looking for a measure of sovereign emerging markets. The EMGBI rules and methodologies are consistent with those of the FTSE World Government Bond Index (WGBI) to enable performance comparisons across sovereign debt markets.
