

FTSE Multi-Asset Global Core Infrastructure Index

Multi-Sector | Multi-Currency

The FTSE Multi-Asset Global Core Infrastructure Index (MAGCII) is a comprehensive, multi-asset, multi-currency index diversified across three FTSE Russell defined infrastructure sectors. The Index is designed to reflect the performance of infrastructure equity and fixed income securities worldwide, including coverage of Developed and Emerging equity markets, as well as Investment-Grade and High-Yield fixed income markets across several major currencies, from both corporate and quasi-government issuers. The Index covers a broad array of sectors, countries and currencies, and sub-indices are available across a variety of sectorizations. The Index benefits from FTSE Russell's two step approach to defining "core" infrastructure, which considers both industry classification and revenue derived from infrastructure core activities.

The index universe for the FTSE Multi-Asset Core Infrastructure Index is comprised of the current constituents of the FTSE Global Core Infrastructure Series and the FTSE Fixed Income Core Infrastructure Index at the start of the first business day of each month. The base currency of the index series is US Dollars (USD). The Index is also published in other currencies, including EUR, GBP, and JPY.

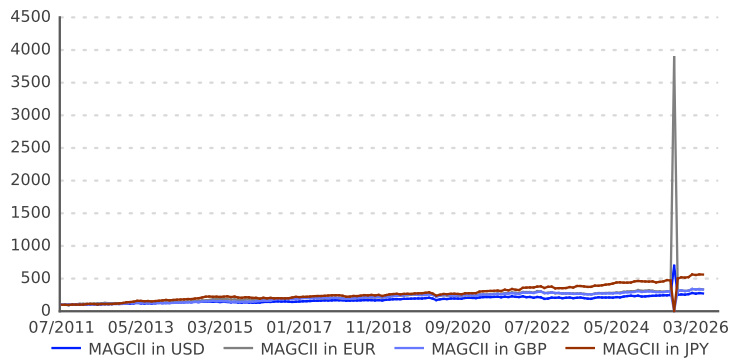

Please refer to individual factsheets or ground rules documents on lseg.com for the design criteria of the FTSE Global Core Infrastructure Index Series and FTSE Fixed Income Core Infrastructure Bond Index Series.

DESIGN CRITERIA AND CALCULATION METHODOLOGY

Universe:	Equity - including both developed and emerging markets Fixed Income - multi-currency fixed-rate, investment-grade and high yield credit universe, covering corporate and quasi-government core infrastructure issuers
Defining Infrastructure:	FTSE defines infrastructure as issuers that own, manage or operate structures or networks, which are used for the processing or movement of goods, services, information/data, people, energy and necessities from one location to another. FTSE uses a two-step process to identify issuers which satisfy infrastructure related criteria. Firstly, the eligible universe is defined according to a list of eligible COBS sectors, selected to capture issuers consistent with the above definition. Secondly, proprietary research is undertaken to determine the percentage of an issuer's revenue derived from infrastructure core activities (see ground rules for the full list); these revenue percentages determine whether an issuer will be included in the core infrastructure universe.
