

FTSE Global Social Impact Bond Index

Multi-Sector | Multi-Currency

The FTSE Global Social Impact Bond Index (Global Social Impact) provides a comprehensive measure of the global social bond market across various asset classes and credit sectors. Its constituents are selected from various FTSE Fixed Income indices, screened in accordance with the transparent and defined social bond criteria.

The Global Social Impact leverages LSEG Reference Data Services to identify underlying bonds that are in compliance with corresponding international guidelines. Specifically, LSEG Reference Data Services identifies eligible Social Bonds that are in line with the core components of International Capital Markets Association (ICMA) Social Bond Principles (SBP).

The Global Social Impact measures the performance of both investment-grade and high-yield multi-currency social debt issued by government, government-sponsored, supranational, covered, and corporations.
