

Russell Midcap Value Index

About the index

The Russell Midcap® Value Index measures the performance of the mid-cap value segment of the US equity universe. It includes those Russell Midcap Index companies with relatively lower price-to-book ratios, lower I/B/E/S forecast medium term (2 year) growth and lower sales per share historical growth (5 years). The Russell Midcap Value Index is constructed to provide a comprehensive and unbiased barometer of the mid-cap value market. The index is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true mid-cap value market.

Russell Growth and Value indexes set the Style standard

Representative

Designed to better adapt to the changing markets, this groundbreaking innovation has now become industry standard with a comprehensive series of US Style indexes that best reflect the specific style or market segment being measured.

Practical

The Russell Style Indexes provide investors with a practical set of indexes that can be used to express different style views, as benchmarks or as the basis of passive funds.

Robust

To create its Style indexes, FTSE Russell employs a multi-variable approach, using book-to-price, I/B/E/S forecast medium-term growth and historical sales per share growth to determine whether a company is part of the Growth or Value investment universe.
