

Russell 1000[®] Pure Value Index

Data as at: 29 March 2024

The Russell Pure Style Indexes provide concentrated exposure to stocks that exhibit strong growth or value signals. Building upon Russell's traditional, cap-weighted style methodology, the Pure Style methodology is style-weighted, and effectively narrows the universe delivering a more tailored, 'pure' exposure to only those stocks considered fully value or growth.

The Pure Style indexes were designed as additional tools for investors employing size and style investing strategies. Whether the desired outcomes are to strike a balance between growth and value segments with large-, mid- and small-cap exposures or to dynamically and tactically tilt, these indexes provide sharp, focused, non-overlapping exposures to growth and value.

FEATURES

Objective

The indexes are designed for the creation of index tracking funds, derivatives and as a performance benchmark.

Investability

A transparent and replicable index construction strategy.

Liquidity

Stocks in the underlying universe are screened to ensure that the index is tradable.

Capping

At reconstitution, the sector weights of each of the Russell Pure Style indexes are capped at 10% above the sector weight of the corresponding Style index

Transparency

The index uses a transparent, rules-based construction process. Index Rules are freely available on the FTSE Russell website.

Availability

The index is calculated based on price and total return methodologies, available end of day.

Industry Classification Benchmark

Index constituents are categorized in accordance with the Industry Classification Benchmark (ICB), the global standard for industry sector analysis.
