

FTSE EPRA Nareit Developed REITs and Non-REITs Indices

Data as at: 31 March 2025

The FTSE EPRA Nareit Global Real Estate Index Series is designed to represent general trends in eligible real estate equities worldwide. Relevant activities are defined as the ownership, trading and development of income-producing real estate. The index series now covers Global, Developed and Emerging indices, as well the UK's AIM market.

The FTSE EPRA Nareit Developed REITs and Non-REITs Indices are designed to provide investors with the diversification that real estate offers due to its low correlation with other asset classes, along with sufficient liquidity to gain access to the asset class easily. The new indices are a subset of the FTSE EPRA Nareit Developed Index, separating the existing constituents into both REIT and Non-REIT indices thereby providing investors with additional granularity in the market place. By making the constituents of the indices free-float adjusted, liquidity, size and revenue screened, they are suitable for use as the basis for investment products, such as derivatives and Exchange Traded Funds (ETFs).

Definition of REITs and Non-REITs

A REIT is a publicly traded real estate company that owns, and in most cases, operates income-producing real estate such as apartments, shopping centres, offices, hotels and warehouses. Some REITs also engage in financing real estate. The shares of many REITs are freely traded, usually on a major stock exchange. REITs provide investors with a liquid and cost efficient way to earn the investment returns typically available from direct real estate investment. To qualify as a REIT, a company must satisfy certain requirements set forth by legislation or regulation in the country in which it is domiciled, including distributing at least 90 percent of its taxable income to its shareholders annually. A company that qualifies as a REIT is permitted to deduct dividends paid to its shareholders from its corporate taxable income. As a result, most remit 100 percent of their taxable income to their shareholders and therefore owe no corporate tax. Taxes are paid by shareholders on the dividends received and any capital gains. Half of the countries in the FTSE EPRA Nareit Global Real Estate Index Series have REIT legislation in place. As more countries seek to provide investors with publicly traded real estate investments, that number is expected to increase. Non-REIT property companies are those which are either domiciled in countries without REIT legislation or which have chosen not to opt for REIT status.

5-Year Performance - Total Return

FEATURES

Coverage

The FTSE EPRA Nareit Developed REITs and Non-REITs Indexes are a subset of the FTSE EPRA Nareit Developed Index, separating the existing constituents into both REITs and Non-REITs Indexes.

Diversified Investment Opportunities

The indexes provides investors with the diversification that real estate offers due to its low correlation with other asset classes, along with sufficient liquidity to gain access to the asset class.

Objective

The indexes are designed for the creation of index tracking funds, derivatives and as a performance benchmark.

Investability

Stocks are selected and weighted to ensure that the index is investable.

Liquidity

Stocks are screened to ensure that the index is tradable.

Transparency

Index methodologies are freely available on the FTSE Russell website.

Availability

The indexes are calculated based on price and total return methodologies, both real time and end-of-day. Net TRI versions of the indexes are also available.

Property Sector Classification

Constituents are classified into distinct Property Sectors based on gross invested book assets as disclosed in the latest published financial statement.
