

# FTSE France SMID Cap Tradable Plus Index

Data as at: 29 March 2024

The FTSE France SMID Cap Tradable Plus Index is a rapidly tradable index that encapsulates the behaviour of the small- and mid-cap (SMID) France equity market. By design, the index has a limited number of highly liquid constituents, allowing easy market access, while maintaining FTSE Russell's tradition of rules-based, transparent index construction. Its innovative approach to constituent selection ensures easy and rapid trading of each underlying constituent and of the investable products based on the index as a whole, and a broad representation of stocks from across the capitalisation range.
