

FTSE Canada High Dividend Yield Index

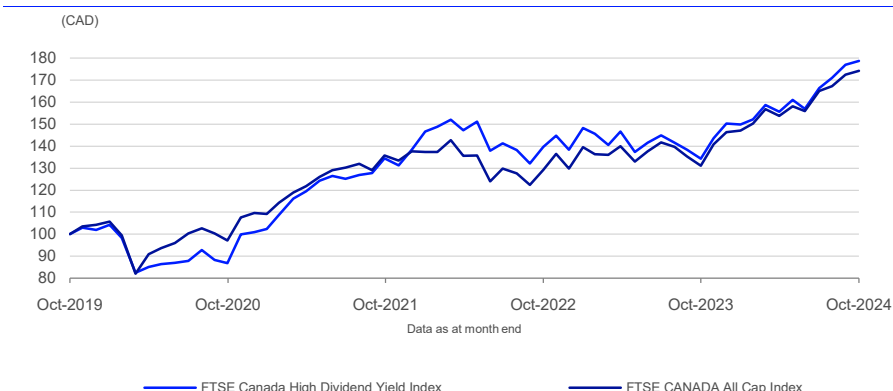

Data as at: 31 October 2024

The FTSE Canada High Dividend Yield Index comprises stocks that are characterized by higher than-average dividend yields. The index universe is based on the large, mid and small cap constituents of the Canada country component of the FTSE Global Equity Index Series (FTSE GEIS). The Ground Rules for FTSE GEIS also form the basis for the management of the FTSE Canada High Dividend Yield Index.

FTSE Russell takes a starting universe of large, mid and small cap stocks within the Canada component of FTSE GEIS and ranks these stocks based on their annual forecasted dividend yields. Stocks are then selected based on yield until their combined market capitalization accounts for 50% of the total market cap of the universe of stocks. These stocks are then market cap weighted to form the ending index.

The FTSE Canada High Dividend Yield index will be reviewed annually. The annual review will be implemented in line with the FTSE GEIS North America regional review and rebalanced quarterly (March, June, September and December).
