

FTSE Canada High Dividend Yield Index

Data as at: 30 April 2026

The FTSE Canada High Dividend Yield Index comprises stocks that are characterized by higher than-average dividend yields. The index universe is based on the large, mid and small cap constituents of the Canada country component of the FTSE Global Equity Index Series (FTSE GEIS). The Ground Rules for FTSE GEIS also form the basis for the management of the FTSE Canada High Dividend Yield Index.

FTSE Russell takes a starting universe of large, mid and small cap stocks within the Canada component of FTSE GEIS and ranks these stocks based on their annual forecasted dividend yields. Stocks are then selected based on yield until their combined market capitalization accounts for 50% of the total market cap of the universe of stocks. These stocks are then market cap weighted to form the ending index.

The FTSE Canada High Dividend Yield index will be reviewed annually. The annual review will be implemented in line with the FTSE GEIS North America regional review and rebalanced quarterly (March, June, September and December).

No member of LSEG nor their respective directors, officers, employees, partners or licensors make any representation regarding the advisability of investing in any asset or whether such investment creates any legal or compliance risks for the investor. A decision to invest in any such asset should not be made in reliance on any information herein. Indices and rates cannot be invested in directly. Inclusion of an asset in an index or rate is not a recommendation to buy, sell or hold that asset nor confirmation that any particular investor may lawfully buy, sell or hold the asset or an index or rate containing the asset. The general information contained in this publication should not be acted upon without obtaining specific legal, tax, and investment advice from a licensed professional.

Past performance is no guarantee of future results. Charts and graphs are provided for illustrative purposes only. Index and/or rate returns shown may not represent the results of the actual trading of investable assets. Certain returns shown may reflect back-tested performance. All performance presented prior to the index or rate inception date is back-tested performance. Back-tested performance is not actual performance, but is hypothetical. The back-test calculations are based on the same methodology that was in effect when the index or rate was officially launched. However, back-tested data may reflect the application of the index or rate methodology with the benefit of hindsight, and the historic calculations of an index or rate may change from month to month based on revisions to the underlying economic data used in the calculation of the index or rate.
