## FEATURES

### Coverage

Eligible N Shares will follow the same qualification criteria such as the screening of free float, market capitalisation, and liquidity that are applied to the periodic North American regional reviews of the FTSE Global Equity Index Series to determine its inclusion and exclusion to the FTSE China N Share Index.

### Objective

The index is designed for use in the creation of index tracking funds, derivatives and as a performance benchmark.

### Investability

Stocks are free-float weighted to ensure that only the investable opportunity set is included within the indexes.

### Capping

For the capped version the index, individual constituent weights are capped at 10% on a quarterly basis to avoid over-concentration in any one stock.

### Liquidity

Stocks are screened to ensure that the index is tradable.

### Transparency

Index methodologies are freely available on the FTSE Russell website.

### Availability

The index is calculated based on price and total return methodologies, both real time and end-of-day. A Net Total Return index is also available.

### Industry Classification Benchmark (ICB)

Index constituents are categorized in accordance with the Industry Classification Benchmark (ICB), the global standard for industry sector analysis.
