

Russell 1000 Growth Index

About the index

The Russell 1000® Growth Index measures the performance of the large-cap growth segment of the US equity universe. It includes those Russell 1000 companies with relatively higher price-to-book ratios, higher I/B/E/S forecast medium term (2 year) growth and higher sales per share historical growth (5 years). The Russell 1000® Growth Index is constructed to provide a comprehensive and unbiased barometer for the large-cap growth segment. The index is completely reconstituted annually to ensure new and growing equities are included and that the represented companies continue to reflect growth characteristics.

Russell Growth and Value indexes set the Style standard

Representative

Designed to better adapt to the changing markets, this groundbreaking innovation has now become industry standard with a comprehensive series of US Style indexes that best reflect the specific style or market segment being measured.

Practical

The Russell Style Indexes provide investors with a practical set of indexes that can be used to express different style views, as benchmarks or as the basis of passive funds.

Robust

To create its Style indexes, FTSE Russell employs a multi-variable approach, using book-to-price, I/B/E/S forecast medium-term growth and historical sales per share growth to determine whether a company is part of the Growth or Value investment universe.
