

FTSE All-World ex CW Climate Balanced Factor

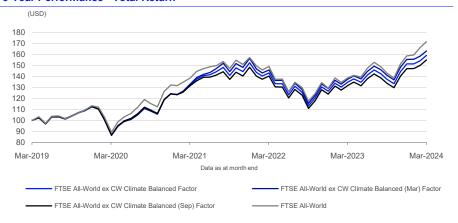

Data as at: 29 March 2024

Indices

The FTSE All-World ex CW Climate Balanced Factor Index is designed to reflect the performance of a diversified index combining climate change considerations and risk premia factor exposures. Constituent weights take into account the climate risks and opportunities associated with the transition to a low-carbon economy and a range of factor adjustments, achieving balanced exposure to Value, Quality, Low Volatility and (Small) Size.

The FTSE All-World ex CW Climate Balanced Factor Index consists of an equal combination of two annually reviewed indices – the FTSE All-World ex CW Climate Balanced Factor (Mar) Index and the FTSE All-World ex CW Climate Balanced Factor (Sep) Index. The indices combine data and analysis from FTSE Russell and the Transition Pathway Initiative (TPI), and apply the following exclusions: controversial weapons, thermal coal extraction (25% revenue threshold) & thermal coal power generation (25% revenue threshold).

Past performance is no guarantee of future results. Charts and graphs are provided for illustrative purposes only. Index and/or rate returns shown may not represent the results of the actual trading of investable assets. Certain returns shown may reflect back-tested performance. All performance presented prior to the index or rate inception date is back-tested performance. Back-tested performance is not actual performance, but is hypothetical. The back-test calculations are based on the same methodology that was in effect when the index or rate was officially launched. However, back-tested data may reflect the application of the index or rate methodology with the benefit of hindsight, and the historic calculations of an index or rate may change from month to month based on revisions to the underlying economic data used in the calculation of the index or rate.
