

FTSE US Market Based Allocation Index Series

Data as at: 29 February 2024

The FTSE US Market Based Allocation Indices are part of the FTSE Market Based Allocation Index Series. They are multi-asset benchmarks covering equities, fixed income, cash, and other investments, designed for US market participants with differing risk tolerance levels. The asset allocation weights are derived from asset allocations of eligible funds reported in the Morningstar Fund Database, grouped into cohorts by their historical volatility levels.

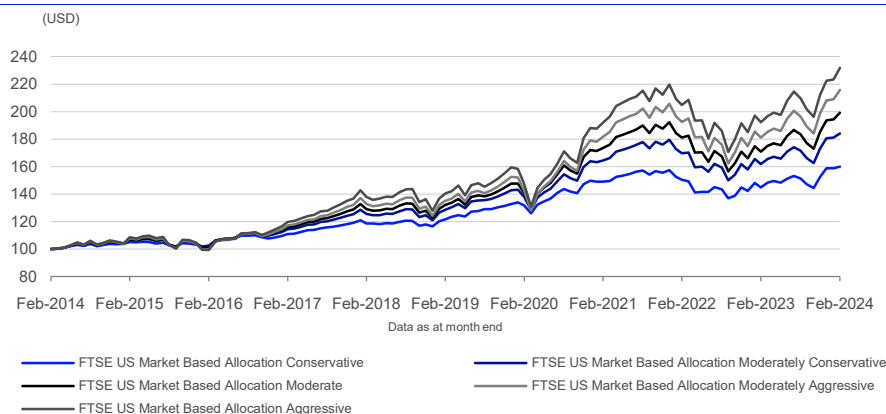

5 Benchmark Indices:

- FTSE US Market Based Allocation Conservative Index: designed to represent the performance of a multi-asset benchmark with a low level (5th quintile) of historical volatility.
- FTSE US Market Based Allocation Moderately Conservative Index: designed to represent the performance of a multi-asset benchmark with a below average level (4th quintile) of historical volatility.
- FTSE US Market Based Allocation Moderate Index: designed to represent the performance of a multi-asset benchmark with an average level (3rd quintile) of historical volatility.
- FTSE US Market Based Allocation Moderately Aggressive Index: designed to represent the performance of a multi-asset benchmark with an above average level (2nd quintile) of historical volatility.
- FTSE US Market based Allocation Aggressive Index: designed to represent the performance of a multi-asset benchmark with a high level (1st quintile) of historical volatility.

The user of the information assumes the entire risk of any use it may make or permit to be made of the information.

No responsibility or liability can be accepted by any member of LSEG nor their respective directors, officers, employees, partners or licensors for (a) any loss or damage in whole or in part caused by, resulting from, or relating to any inaccuracy (negligent or otherwise) or other circumstance involved in procuring, collecting, compiling, interpreting, analysing, editing, transcribing, transmitting, communicating or delivering any such information or data or from use of this document or links to this document or (b) any direct, indirect, special, consequential or incidental damages whatsoever, even if any member of LSEG is advised in advance of the possibility of such damages, resulting from the use of, or inability to use, such information.

No member of LSEG nor their respective directors, officers, employees, partners or licensors provide investment advice and nothing in this document should be taken as constituting financial or investment advice. No member of LSEG nor their respective directors, officers, employees, partners or licensors make any representation regarding the advisability of investing in any asset or whether such investment creates any legal or compliance risks for the investor. A decision to invest in any such asset should not be made in reliance on any information herein. Indices and rates cannot be invested in directly. Inclusion of an asset in an index or rate is not a recommendation to buy, sell or hold that asset nor confirmation that any particular investor may lawfully buy, sell or hold the asset or an index or rate containing the asset. The general information contained in this publication should not be acted upon without obtaining specific legal, tax, and investment advice from a licensed professional.

Past performance is no guarantee of future results. Charts and graphs are provided for illustrative purposes only. Index and/or rate returns shown may not represent the results of the actual trading of investable assets. Certain returns shown may reflect back-tested performance. All performance presented prior to the index or rate inception date is back-tested performance. Back-tested performance is not actual performance, but is hypothetical. The back-test calculations are based on the same methodology that was in effect when the index or rate was officially launched. However, back-tested data may reflect the application of the index or rate methodology with the benefit of hindsight, and the historic calculations of an index or rate may change from month to month based on revisions to the underlying economic data used in the calculation of the index or rate.
