

FTSE Nareit US Real Estate Capped Index Series

Data as at: 29 February 2024

The FTSE Nareit® US Real Estate Capped Index Series is designed to provide the most comprehensive assessment of overall industry performance, and includes all tax-qualified real estate investment trusts (REITs) that are listed on the New York Stock Exchange, the NYSE Arca or the NASDAQ National Market List. The objective of capping the FTSE Nareit US Real Estate Capped Index Series is to achieve no greater than 22.5% cap in any stock and all stocks above 5% to not exceed 45%. The weights within the index are allowed to float intra-review until the next quarterly review.

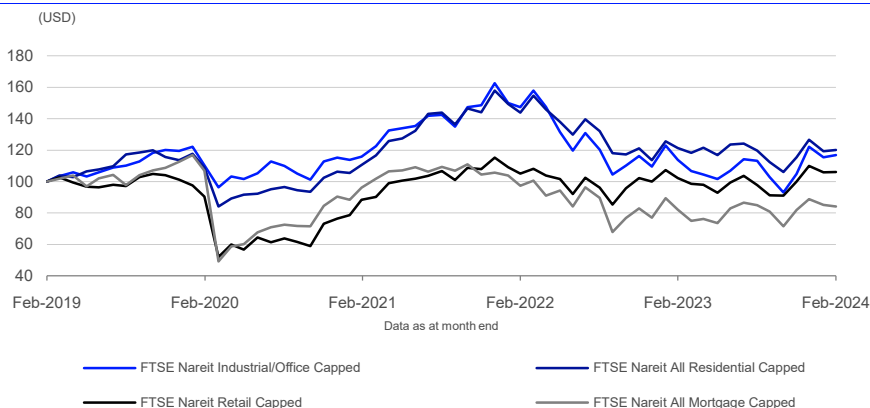

The FTSE Nareit US Real Estate Capped Index Series consists of 4 indexes:

FTSE Nareit Industrial/Office Capped Index
 FTSE Nareit All Residential Capped Index
 FTSE Nareit Retail Capped Index
 FTSE Nareit All Mortgage Capped Index

About REITs

A REIT is a company that owns, and in most cases, operates income-producing real estate such as apartments, shopping centers, offices, hotels and warehouses. Some REITs also engage in financing real estate. The shares of many REITs are freely traded, usually on a major stock exchange. To qualify as a REIT, a company must distribute at least 90% of its taxable income to its shareholders annually. A company that qualifies as a REIT is permitted to deduct dividends paid to its shareholders from its corporate taxable income. As a result, most REITs remit at least 100% of their taxable income to their shareholders and therefore owe no corporate tax. Taxes are paid by shareholders on the dividends received and any capital gains. Most states honor this federal treatment and also do not require REITs to pay state income tax. Like other businesses, but unlike partnerships, a REIT cannot pass any tax losses through to its investors.

5-Year Performance - Total Return

FEATURES

Coverage

Publicly listed US REITs.

Objective

The indexes are designed for the creation of structured products, index tracking funds, or as a performance benchmark.

Investability

Stocks are free-float weighted to ensure that only the investable opportunity set is included within the indexes.

Liquidity

Stocks are screened to ensure that the indexes are tradable.

Capping

Individual constituent weights are capped on a quarterly basis to avoid over-concentration.

Transparency

The indexes use a transparent, methodologies-based construction process. Index methodologies are freely available on the FTSE Russell website.

Availability

The index is calculated based on price and total return methodologies, available end-of-day.

Performance and Volatility - Total Return

Index (USD)	Return %						Return pa %*		Volatility %**
