

# FTSE4Good Emerging Indexes

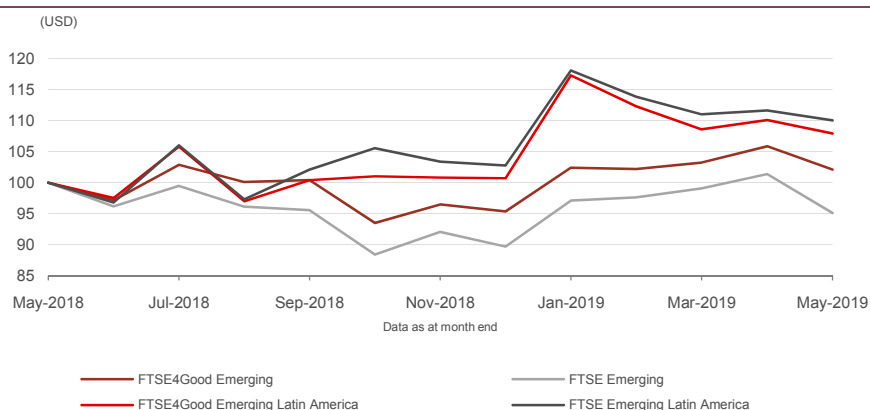

Data as at: 31 May 2019

The FTSE4Good Index Series is a tool for investors that wish to align their portfolios with their values, or seek to invest in companies based on their management of ESG risks and demonstration of leading management practices. The FTSE4Good Emerging Indexes are designed to measure the performance of companies in emerging markets that meet the globally recognised ESG inclusion standards used by the FTSE4Good Index Series.

To remain consistent with market expectations and developments in ESG practice the inclusion criteria are revised regularly. Criteria development is overseen by the independent FTSE Russell ESG Advisory committee, consisting of senior investment market practitioners and other leading experts from a range of areas including academia, non-governmental and inter-governmental organizations, companies and trade unions. This helps to ensure that the ESG Ratings methodology and the associated index products, including the FTSE4Good Index Series, evolve in line with the highest standards in the industry and continue to meet market needs.

Each year, FTSE Russell's ESG analysts communicate with all companies in the research universe and conduct detailed engagement with companies facing potential index deletion or trying to improve their ESG practices. Through this process FTSE4Good Indexes have had a measurable impact on the ESG practices of hundreds of companies around the world.

## FEATURES

### Transparency

Index governance is overseen by the independent FTSE Russell ESG Advisory Committee, made up of leading global sustainable investment market practitioners and experts on global Environmental, Social and Governance (ESG) principles and criteria used to determine comparative corporate ESG performance.

### Criteria

Companies need to meet a variety of environmental, social and governance criteria to meet the inclusion requirements. Please see [www.ftserussell.com](http://www.ftserussell.com) for details

### Objective

The indexes are designed for use in the creation of index tracking funds, derivatives and as performance benchmarks.

### Investability

Stocks are selected and weighted to ensure that the indexes are investable.

### Liquidity

Stocks are screened to ensure that the indexes are tradable.

### Availability

The indexes are calculated based on price and total return methodologies, both real time and end-of-day.

### Industry Classification Benchmark (ICB)

Index constituents are categorized in accordance with the Industry Classification Benchmark (ICB), the global standard for industry sector analysis.
