

# Russell 1000<sup>®</sup> Equal Weight Index

Data as at: 29 July 2022

The Russell Equal Weight Indexes offer a unique and practical alternative to conventional equal weighted indexes. Rather than simply assigning an equal weight to each constituent of the index, Russell's industry equal weight index methodology equally weights each industry within the index and then equally weights the companies within each industry. This innovative approach provides greater diversification benefits than traditional equal weighted indexes.

Equal weighting randomizes economic factor mispricing as well as prevents a few large companies from driving the index's performance. Russell Equal Weight Indexes offer enhanced protection by equally weighting across eleven industries as defined by the ICB Classification Scheme (Technology, Telecommunications, Health Care, Financials, Real Estate, Consumer Discretionary, Consumer Staples, Industrials, Basic Materials, Energy and Utilities) to control for industry risk. Russell Equal Weight Indexes are re-weighted on a quarterly basis.
