

FTSE ET Developed 50 8% Capped Index

Data as at: 31 August 2022

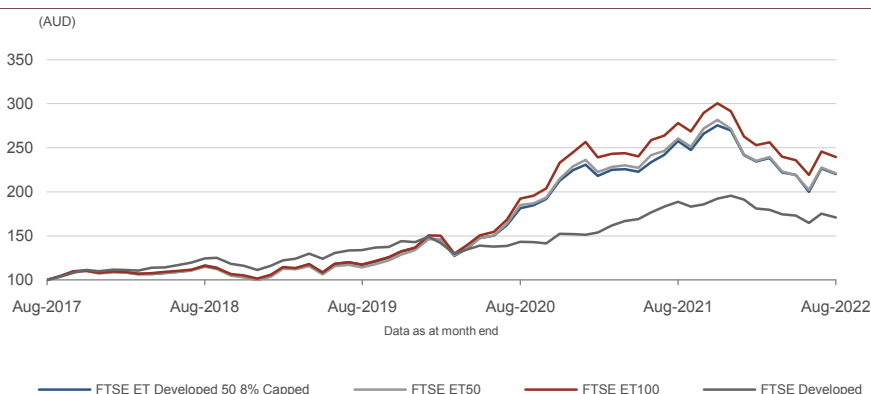

The FTSE Environmental Technology Index Series measures the performance of companies globally whose core business is in the development and deployment of environmental technologies as defined by the FTSE Environmental Markets Classification System (EMCS). These include Renewable & Alternative Energy, Energy Efficiency, Water Infrastructure & Technology, Waste Management & Technologies, Pollution Control, Environmental Support Services, and Food, Agriculture & Forestry. Forming part of the overall FTSE Environmental Markets Index Series, the FTSE Environmental Technology Index Series requires companies to have at least 50% of their business derived from environmental markets and technologies (as opposed to at least 20% for the FTSE Environmental Opportunities Index Series). The FTSE Environmental Technology Index Series has been developed in collaboration with Impax Asset Management and under the direction of the independent FTSE Environmental Markets Committee, providing investors with a robust set of Environmental Markets tools.

The FTSE Environmental Technologies Index Series consists of three indexes. The FTSE ET50 Index and the FTSE ET100 Index, which, respectively, comprise the 50 and 100 largest pure play environmental technology companies globally, by full market capitalisation. The weight of each constituent is based on its float-adjusted market capitalization followed by being capped at 10% of the whole index quarterly.

FTSE ET Developed 50 8% Capped Index consists of the largest 50 companies by full market capitalization within the FTSE ET100 Index that are assigned a developed market nationality. The weight of each constituent is based on its float-adjusted market capitalization followed by being capped at 8% of the whole index quarterly to prevent large companies from exerting an over-representation on the index as they grow in size.

The indexes are designed to measure the performance of companies that have a core business in the development and operation of environmental technologies.

5-Year Performance - Total Return

FEATURES

Coverage

The FTSE Environmental Technology Index Series features within the overall FTSE Environmental Markets Index Series.

Objective

The indexes are designed for the creation of index tracking funds, derivatives and as a performance benchmark.

Investability

Stocks are selected and weighted to ensure that the index is investable.

Liquidity

Stocks are screened to ensure that the index is tradable.

Capping

The weight of each constituent is based on its float-adjusted market capitalization followed by being capped at 8% of the whole index quarterly to prevent large companies from exerting an over-representation on the index as they grow in size.

Transparency

Index methodologies are freely available on the FTSE Russell website.

Availability

The indexes are calculated based on price and total return methodologies, both real time and end-of-day.

Industry Classification Benchmark (ICB)

Index constituents are categorized in accordance with the Industry Classification Benchmark (ICB), the global standard for industry sector analysis.

About Impax Asset Management

Impax Asset Management is an award winning, leading investment manager dedicated to investing in the opportunities created by the scarcity of natural resources and the growing demand for cleaner, more efficient products and services, through both listed and private equity strategies.

Impax's listed equity funds seek out mis-priced companies that are set to benefit from the long-term trends of changing demographics, urbanisation, rising consumption, and the resultant increases in resource scarcity. Investment is focused on a small number of deeply researched global equity strategies across alternative energy, energy efficiency, water, waste, food and agriculture related markets.

Impax's private equity infrastructure funds follow an operationally focused, value-add strategy, investing in renewable power generation and related assets throughout Europe. The Climate Property Fund focuses on developing sustainable and energy efficient commercial property, primarily in the UK, adding synergistically to Impax's wider real asset investment strategy within private markets.
