

FTSE RAFI™ US 1000 Long Short Total Return Index

Data as at: 31 August 2020

The FTSE RAFI US 1000 Long Short Total Return Index has been designed to reflect the performance spread between an index of US equities weighted by specific fundamental factors and its market cap weighted counterpart.

The FTSE RAFI US 1000 Index comprises the 1000 US-listed companies with the largest RAFI fundamental scores selected from a constituent universe of all common stocks on the New York Stock Exchange American Stock Exchange (NYSE AMEX) and NASDAQ National Market System. The universe is screened for nationality, free float, liquidity and multiple line rules according to the FTSE Global Equity Index Series Ground Rules.

FTSE partners with Research Affiliates on the FTSE RAFI Index Series. Index constituents are weighted using a composite of fundamental factors, including total cash dividends, free cash flow, total sales and book equity value. Prices and market values are not determinants of the index weights. Consequently the indices are less prone to excessive concentration arising from market fads, which can result in over-exposure to individual companies, sectors or countries.
