

FTSE/JSE Minimum Variance Indices

Data as at: 26 February 2021

The FTSE/JSE Africa Index Series is designed to represent the performance of South African companies, providing investors with a comprehensive and complementary set of indices, which measure the performance of the major capital and industry segments of the South African market.

The FTSE/JSE Minimum Variance Indices are designed to minimise the volatility of the underlying indices based on historical return information, thereby offering potential improvements to the risk reward trade-off of the index.

Additional constraints on the weight of a single stock (<4.5%) and the weight of an individual ICB Industry (<20%) ensure the index is investable and diversified.

Annualised Rolling 252 Day Volatility- FTSE/JSE Top 40 Minimum Variance

FEATURES

Methodology

The approach applies a rules-based strategy to minimise the volatility of the FTSE/JSE Top 40 and FTSE/JSE All-Share indices.

Objective

The index is designed for use in the creation of index tracking funds, derivatives and as a performance benchmark.

Investability

Stocks are selected and weighted to ensure that the index is investable.

Liquidity

Stocks are subject to an additional liquidity screen to ensure that the index is tradable.

Transparency

The indices use a transparent, rules-based construction process. Index Rules are freely available on the FTSE website.

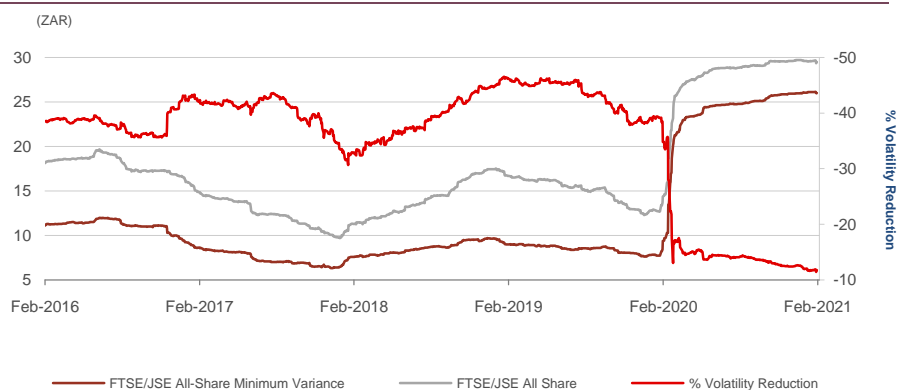

Availability

The index is calculated based on price and total return methodologies, available end-of-day.

Industry Classification Benchmark

Index constituents are categorized in accordance with the Industry Classification Benchmark (ICB), the global standard for industry sector analysis.
