

FTSE4Good Japan Index

Data as at: 31 December 2021

The FTSE4Good Index Series is a market-leading tool for investors that wish to align their portfolios with their values, or seek to invest in companies based on their management of ESG risks and demonstration of leading management practices. The FTSE4Good Japan Index is designed to measure the performance of companies in Japan that meet the globally recognised ESG inclusion standards used by the FTSE4Good Index Series.

To remain consistent with market expectations and developments in ESG practice the inclusion criteria are revised regularly. Criteria development is overseen by the independent FTSE Russell ESG Advisory committee, consisting of senior investment market practitioners and other leading experts from a range of areas including academia, non-governmental and inter-governmental organizations, companies and trade unions. This helps to ensure that the ESG Ratings methodology and the associated index products, including the FTSE4Good Index Series, evolve in line with the highest standards in the industry and continue to meet market needs.

Each year, FTSE Russell's ESG analysts communicate with all companies in the research universe and conduct detailed engagement with companies facing potential index deletion or trying to improve their ESG practices. Through this process FTSE4Good Indexes have had a measurable impact on the ESG practices of hundreds of companies around the world.
