

FTSE Nareit RORI REITs Index

Data as at: 30 June 2025

The FTSE Nareit RORI REITs Index is designed to track, benchmark and analyze the Residential, Office, Retail and Industrial (RORI) sectors of the US-listed REIT market. The Index also includes REITs classified in the unique RORI REITs Diversified category, defined as those where the combined ownership of Residential, Office, Retail and/or Industrial properties exceeds 75% of total property ownership. The index provides a relevant and informative way to measure the performance of listed real estate investments that are focused on the core property sectors.

About REITs

A REIT is a company that owns, and in most cases, operates income-producing real estate such as apartments, shopping centers, offices, hotels and warehouses. Some REITs also engage in financing real estate. The shares of many REITs are freely traded, usually on a major stock exchange. To qualify as a REIT, a company must distribute at least 90% of its taxable income to its shareholders annually. A company that qualifies as a REIT is permitted to deduct dividends paid to its shareholders from its corporate taxable income. As a result, most REITs remit at least 100% of their taxable income to their shareholders and therefore owe no corporate tax. Taxes are paid by shareholders on the dividends received and any capital gains. Most states honor this federal treatment and also do not require REITs to pay state income tax. Like other businesses, but unlike partnerships, a REIT cannot pass any tax losses through to its investors.
