

# FTSE ASEAN All-Share Shariah Index

Data as at: 30 May 2025

The FTSE ASEAN All-Share Shariah Index has been designed to be used as the basis of Shariah compliant investment products that focus on Shariah-compliant companies listed on the seven leading ASEAN financial markets: Bursa Malaysia, Hanoi Stock Exchange, Hochiminh Stock Exchange, Indonesia Stock Exchange, The Philippine Exchange, Singapore Exchange, and The Stock Exchange of Thailand. Independent screening is carried out by Yasaar Ltd, an organisation with a global network of expert Shariah scholars. Their approach is described below.

Using the FTSE ASEAN All-Share Index as a base universe, constituents are screened against a clear set of Shariah principles to create a robust Shariah-compliant index for the ASEAN markets.

## Business Activity Screening

Initially, companies involved in any of the following activities will be filtered out as non Shariah-compliant:

- Conventional finance (non-Islamic banking, finance and insurance, etc.);
- Alcohol;
- Pork related products and non-halal food production, packaging and processing or any other activity related to pork and non-halal food;
- Entertainment (casinos, gambling and pornography);
- Tobacco; weapons, arms and defence manufacturing.

## Financial Ratios Screening

The remaining companies are then further screened on a financial basis. The following financial ratios must be met for companies to be considered Shariah-compliant:

- Debt is less than 33.333% of total assets;
- Cash and interest bearing items are less than 33.333% of total assets;
- Accounts receivable and cash are less than 50% of total assets;
- Total interest and non compliant activities income should not exceed 5% of total revenue.

## 5-Year Performance - Total Return

## FEATURES

### Coverage

Shariah-compliant stocks within the FTSE ASEAN All-Share Index.

### Objective

The index is designed for use in the creation of Shariah-compliant investment products and as a benchmark.

### Investability

Stocks are selected and weighted to ensure that the index is investable.

### Liquidity

Stocks are screened to ensure that the index is tradable.

### Transparency

The indices use a transparent, rules-based construction process. Index Rules are freely available on the FTSE website.

### Asset-based debt screening

Unlike other competitor methodologies, a more conservative approach to Shariah compliance is ensured by rating debt ratio limits that are measured as a percentage of total assets, rather than more volatile measures that use 12 month trailing market capitalisation. This ensures companies do not pass the screening criteria due to market price fluctuation, allowing the methodology to be less speculative and more in keeping with Shariah principles.

### School-neutral

Yasaar Limited scholars represent all of the major Shariah schools of thought, creating a best practices approach that has credibility across the Islamic world.

### Industry Classification Benchmark (ICB)

Index constituents are categorised in accordance with the Industry Classification Benchmark (ICB), the global standard for industry sector analysis.

Performance and Volatility - Total Return

Index (USD)	Return %						Return pa %*		Volatility %**		
	3M	6M	YTD	12M	3YR	5YR	3YR	5YR	1YR	3YR	5YR
