

FTSE China 30/18 Capped Index

Data as at: 30 April 2026

FTSE Russell UCITS Capped Indexes are market-capitalization weighted indexes designed to limit concentration in any single security as part of the Undertakings for Collective Investment of Transferable Securities (UCITS) diversification requirements for European Union registered funds. The indexes are a subset of the FTSE Global Equity Index Series (GEIS), which covers 99% of the world's investable market capitalization.

FTSE China 30/18 Capped Index represents the performance of Chinese large and mid capitalisation stocks. The index has a broad coverage of Chinese share classes include A Shares, B Shares, H Shares, Red Chips, P Chips, S Chips and N Shares, where the A Share constituents are available to international investors through Northbound China Stock Connect Scheme, eligible under the scheme's Buy-And-Sell List. The index constituents are weighted by free float, restrictions applied to foreign investors, and reviewed semi-annually. To limit over concentration in any single security, constituents are capped quarterly so the largest company's weight does not exceed 30% and any remaining company weight does not exceed 18%.

10-Year Performance - Total Return

Performance and Volatility - Total Return

Index (USD)	Return %						Return pa %*		Volatility %**		
	3M	6M	YTD	12M	3YR	5YR	3YR	5YR	1YR	3YR	5YR

* Compound annual returns measured over 3 and 5 years respectively

** Volatility – 1YR based on 12 months daily data. 3YR based on weekly data (Wednesday to Wednesday). 5YR based on monthly data

FEATURES

Coverage

Derived from the FTSE Global Equity Index Series (GEIS), which covers 98% of the world's investable market capitalisation.

Objective

The index is designed for use in the creation of index tracking funds, derivatives and as a performance benchmark.

Investability

Stocks are selected and weighted to ensure that the index is investable.

Liquidity

Stocks are screened to ensure that the index is tradable.

Capping

To limit over concentration in any single security, constituents are capped quarterly so the largest company's weight does not exceed 30% and any remaining company weight does not exceed 18%.

Transparency

The index uses a transparent, rules-based construction process. Index Methodologies are freely available on the FTSE Russell website.

Availability

The index is calculated based on price and total return methodologies, both real time and end of day. Net of tax indexes are also available.

Industry Classification Benchmark (ICB)

Index constituents are categorized in accordance with the Industry Classification Benchmark (ICB), the global standard for industry sector analysis.
