

FTSE All-World Value and Growth Indices

Data as at: 30 April 2025

The FTSE Global Style Indices are designed to reflect the performance of large, mid and small cap securities in the FTSE Global Equity Index Series (GEIS) exhibiting value and growth characteristics. The growth and value indices use three highly representative characteristics: Value as determined by Book-to-Price ratio (B/P), and Growth as determined by a combination of two-year forecast I/B/E/S earnings growth rate and five-year historical sales-per-share.

The FTSE All-World Value Index measures the performance of the investable securities in the developed and emerging large and mid cap value segment of the market, which includes companies that are considered more value oriented relative to the overall market. The FTSE All-World Growth Index measures the performance of the investable securities in the developed and emerging large and mid cap growth segment of the market, which includes companies with higher growth earning potential. The Indices are constructed to provide a comprehensive and unbiased barometer for this market segment and is reviewed annually to accurately reflect the changes in the market over time.
