

FTSE Australia 100 TPI Climate Transition Index

Data as at: 31 October 2024

The FTSE Australia 100 TPI Climate Transition Index is designed to reflect the performance of large and mid cap companies in Australia, where constituent weights vary to account for risks and opportunities associated with the transition to a low carbon economy. Constituent weights are based on five key climate considerations: company exposure to green revenues, fossil fuel reserves and carbon emissions; as well as companies' climate governance activities (aligned with the Taskforce on Climate-related Financial Disclosures' recommendations) and forward-looking commitments to carbon emission pathways (aligned to the Paris Agreement and 2DC/1.5DC warming scenarios).

The index combines data and analysis from FTSE Russell and the Transition Pathway Initiative (TPI)
