

# FTSE All-World ex Australia Net Tax (Super) Index

Data as at: 30 May 2025

FTSE All-World ex Australia Net Tax (Super) Index is a market-capitalisation weighted index representing the performance of the large and mid cap stocks from the FTSE Global Equity Index Series and covers 90-95% of the investable market capitalisation. The index covers Developed and Emerging markets. It is the first global FTSE index designed to help the Australian superannuation industry measure net-tax return using tax rates relevant to superannuation funds. It brings greater consistency and transparency to investment reporting.

FTSE Russell calculates a net-of-tax total return index based on dividends received following deduction of withholding tax at the rates applicable to an Australian superannuation fund that benefits from double-taxation treaties. Please note, that withholding tax rates are applied at individual security with tax adjustments to dividends based on the tax residency of company.

A Withholding Tax Rates guide is available for more detailed methodology construction [http://www.ftse.com/products/downloads/FTSE\\_Russell\\_Withholding\\_Tax\\_Guide.pdf](http://www.ftse.com/products/downloads/FTSE_Russell_Withholding_Tax_Guide.pdf)

\* Compound annual returns measured over 3 and 5 years respectively

\*\* Volatility – 1YR based on 12 months daily data. 3YR based on weekly data (Wednesday to Wednesday). 5YR based on monthly data

## FEATURES

### Objective

FTSE Russell calculates a net-of-tax total return index based on dividends received following deduction of withholding tax at the rates applicable to an Australian superannuation fund that benefits from double-taxation treaties.

### Investability

Stocks are selected and weighted to ensure that the index is investable.

### Liquidity

Stocks are screened to ensure that the index is tradable.

### Transparency

Index methodologies are freely available on the FTSE Russell website.

### Availability

The index is calculated based on price and net total return methodologies, both real time and end of day. Hedged versions are also available.

### Industry Classification Benchmark (ICB)

Index constituents are categorized in accordance with the Industry Classification Benchmark (ICB), the global standard for industry sector analysis.
