

FTSE RAFI US BDR 20 Index

Data as at: 30 June 2025

FTSE partners with Research Affiliates on the FTSE RAFI Index Series. Index constituents are weighted using a composite of fundamental factors, including total cash dividends, free cash flow, total sales and book equity value. Prices and market values are not determinants of the index weights. Consequently the indices are less prone to excessive concentration arising from market fads, which can result in over-exposure to individual companies, sectors or countries.

The FTSE RAFI US BDR 20 Index consists of the 20 Brazilian Depository Receipts (BDRs) with the largest RAFI fundamental values from the universe of listed BDRs as listed on BM&F Bovespa where the underlying security has a U.S. nationality as determined by FTSE. Where there are multiple lines of equity capital in a company, all are included and priced separately, provided that they pass index eligibility screens in their own right, therefore the FTSE RAFI US BDR 20 Index may contain more than 20 stocks.
