

# FTSE RAFI™ UK 100 Index – QSR

Data as at: 30 April 2025

FTSE partners with Research Affiliates on the FTSE RAFI Index Series. Index constituents are weighted using a composite of fundamental factors, including total cash dividends, free cash flow, total sales and book equity value. Prices and market values are not determinants of the index weights. Consequently the indices are less prone to excessive concentration arising from market fads, which can result in over-exposure to individual companies, sectors or countries.

The FTSE RAFI UK 100 Index - QSR comprises the 100 companies with the largest RAFI fundamental scores selected from the constituents of the FTSE All-Share Index. The FTSE RAFI UK 100 Index - QSR will be capped on a quarterly basis at 10%. Weighting changes and constituent additions arising from the annual review will be implemented in four stages, using data as of the close of the last business day of February and the close of the first Friday of June, September and December.
