

# FTSE Latin America UCITS Daily Capped Index Series

Data as at: 30 April 2025

The FTSE Latin America UCITS Daily Capped Market-capitalization weighted indexes are designed to limit concentration in any single security as part of the Undertakings for Collective Investment of Transferable Securities (UCITS ) diversification requirements for European Union registered funds. Single or two-level capping approaches are available to limit the weight of companies. Buffers are utilized to ensure that the constituents do not breach the desired targets.

## FEATURES

### Objective

The index is designed for use in the creation of index tracking funds, derivatives and as a performance benchmark.

### Investability

Stocks are selected and weighted to ensure that the index is investable.

### Liquidity

Stocks are screened to ensure that the index is tradable.

### Capping

The index is capped so that no company is greater than 9%, and all companies that have a weight greater than 4.5% in aggregate are no more than 38% of the index. The index is monitored daily to ensure that constituent weights do not breach UCITS thresholds.

### Transparency

The index uses a transparent, rules-based construction process. Index Methodologies are freely available on the FTSE Russell website.

### Availability

The index is calculated based on price and total return methodologies, available end of day.

### Industry Classification Benchmark (ICB)

Index constituents are categorized in accordance with the Industry Classification Benchmark (ICB), the global standard for industry sector analysis.
