FEATURES

Objective

The index is designed for use in the creation of index tracking funds, derivatives and as a performance benchmark.

Investability

Stocks in the underlying index are selected and weighted to ensure that the index is investable.

Capping

At the semi-annual review, the constituents of the FTSE Transpacific Technology 40 Indices are capped such that the total weight allocated to the constituents of the same country is not greater than 55% for USA, 15% for Taiwan, 15% for Japan and 15% for South Korea. At the semi-annual review, the constituents of the FTSE Transpacific Technology 40 Index Series within each country classification are weighted by free float market capitalisation (after the application of any investability weightings), with a 10% company level cap at total index level. The extra weight generated from the capping is distributed pro-rata amongst the remaining constituents within that country classification.

Liquidity

Stocks are screened to ensure that the index is tradable.

Transparency

Index methodologies are freely available on the FTSE Russell website.

Availability

The index is calculated based on end of day price and total return methodologies.
