

FTSE US Risk Premium Forward Earnings Yield Long Only Index

Data as at: 29 May 2026

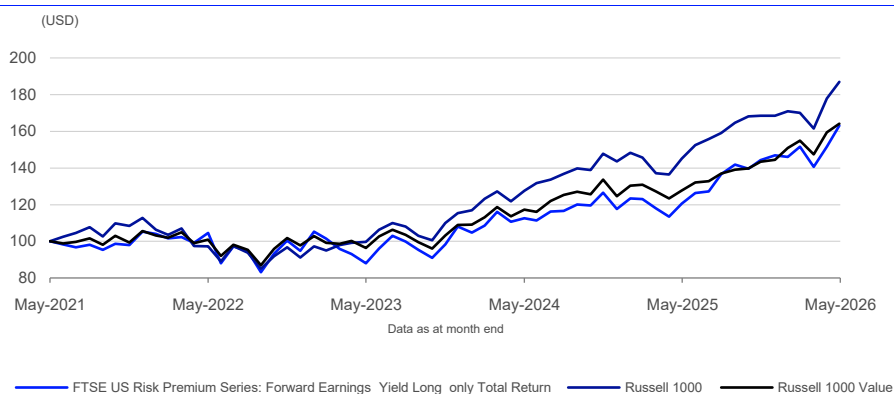

The FTSE US Risk Premium Forward Earnings Yield Long Only Index includes US large/mid cap stocks with high analysts' forward earnings yields and maximizes industry participation providing both diversification and value.

Analyst estimates are sourced on a monthly basis for each stock in the FTSE USA Index. A stock must have at least eight (8) analyst estimates to be included in the Index.

In each industry, forward earnings yield is calculated by generating each stock's analyst forward one year earnings per share estimates and dividing by the stock price as of the calculation date. Each stock is given a z-score, ranging +3.0 to -3.0, based on the magnitude of its forward earnings yield vs other stocks in the industry. Stock z-scores for all industries are combined and ranked highest to lowest.

The top 40 ranked stocks are selected. Reconstitution/rebalancing is monthly. All constituents are equal weighted.
