

FTSE US Risk Premium Factor Free Cash Flow / Invested Capital Trend Long Only Index

Data as at: 30 May 2025

The FTSE US Risk Premium Free Cash Flow / Invested Capital Trend Long Only Index includes US large/mid cap stocks with high free cash flow profitability and maximizes industry participation providing both diversification and quality.

Free cash flow / invested capital trend identifies stocks that have historically delivered high free cash flow profitability with low price volatility. In each industry, a profitability ratio trend is calculated by generating each stock's free cash flow / invested capital ("FCF/IC") as of the calculation date and subtracting the average of the prior four quarters' FCF/IC then dividing by the standard deviation of the prior four quarters' FCF/IC.

FCF/IC is calculated by generating each stock's trailing 12 month free cash flow divided by invested capital as of the calculation date. Invested capital is defined as the sum of the most recently reported value of total capital, short term debt and current portion of long term debt.

Each stock is given a z-score, ranging +3.0 to -3.0, based on the magnitude of its free cash flow / invested capital trend vs other stocks in the industry. Stock z-scores for all industries are combined and ranked highest to lowest.

The top 40 ranked stocks are selected. Reconstitution/rebalancing is monthly. All constituents are equal weighted.

10-Year Performance - Total Return

FEATURES

Objective

The index is designed for use in the creation of index tracking funds, derivatives and as a performance benchmark.

Investability

Stocks are selected and weighted to ensure that the index is investable.

Liquidity

Stocks are screened to ensure that the index is tradable.

Transparency

The index uses a transparent, rules-based construction process. Index methodologies are freely available on the FTSE Russell website.

Availability

The index is calculated based on price and total return methodologies, both real time (USD) and end of day.

Industry Classification Benchmark (ICB)

Index constituents are categorized in accordance with the Industry Classification Benchmark (ICB), the global standard for industry sector analysis.

Performance and Volatility - Total Return

Index (USD)	Return %						Return pa %*		Volatility %**
