

Russell 1000 Green Revenues 50 Index

Data as at: 30 June 2025

The Russell 1000 Green Revenues 50 Index measures the performance of large-cap companies in the US engaged in the transition to a green economy, based on FTSE Russell's Green Revenues data model. The index comprises the top 50 constituents from the Russell 1000 Index, ranked by industry demeaned Green Revenues percentage. The constituent weights are based on market capitalization and Green Revenues percentage, followed by semi-annual capping at 10% of the index to prevent concentration in large companies.

FEATURES

Objective

The indexes are designed for the creation of index tracking funds, derivatives and as a performance benchmark.

Investability

A transparent and replicable index construction strategy.

Liquidity

Stocks in the underlying universe are screened to ensure that the index is tradable.

Capping

To limit over concentration in large companies and sectors, the constituent weights are capped semi-annually so that no more than 10% and no less than 50 bps of the index weight may be allocated to a single constituent, and the ICB industry weights difference between the index and the underlying index cannot be greater than 15%.

Transparency

The index uses a transparent, rules-based construction process. Index methodologies are freely available on the FTSE Russell website.

Availability

The index is calculated based on price and total return methodologies, available end of day.

Industry Classification Benchmark (ICB)

Index constituents are categorized in accordance with the Industry Classification Benchmark (ICB), the global standard for industry sector analysis.
