

FTSE Saudi Arabia 30/18 Capped Index

Data as at: 31 October 2024

FTSE Russell UCITS Capped Indexes are market-capitalization weighted indexes designed to limit concentration in any single security as part of the Undertakings for Collective Investment of Transferable Securities (UCITS) diversification requirements for European Union registered funds. The indexes are a subset of the FTSE Global Equity Index Series (GEIS), which covers 99% of the world's investable market capitalization.

The FTSE Saudi Arabia 30/18 Capped Index represents the performance of Saudi Arabian large and mid capitalization stocks. Securities are weighted based on their free float-adjusted market capitalization and reviewed semi-annually. To limit over concentration in any single security, constituents are capped quarterly so the largest company's weight does not exceed 30% and any remaining company weight does not exceed 18%.
