The FTSE Chinese (Onshore CNY) Green Bond Index – Carbon Neutrality (CNYGRBI-CNB) measures the performance of the onshore Chinese yuan-denominated, fixed-rate governments, agencies and corporate debt issued in mainland China that are labelled or themed Carbon Neutrality Bonds (CNBs). In the context of China's onshore bond market, CNBs are defined as a sub-type of green bonds whose use of proceeds are dedicated to projects that have carbon reduction benefits. These include 1) bonds that commit to comply with the Guidance on Issuing Carbon Neutrality Bonds by China's National Association of Financial Market Institutional Investors (NAFMII), and 2) green bonds whose use of proceeds are allocated to climate change mitigation projects, and carry a statement from the issuer that the offering helps to achieve the issuer's overall carbon neutrality goals.
