

# FTSE ESG World Government Bond Index

Sovereign | Multi-Currency

The FTSE ESG World Government Bond Index measure the performance of fixed-rate, local currency, investment-grade sovereign bonds in the FTSE World Government Bond Index while incorporating a tilting methodology that adjusts index weights according to each country's relative Environmental, Social and Governance (ESG) performance.

The FTSE ESG World Government Bond Index weighs each country based on the market capitalization of its index eligible debt, as well as its relative ESG performance, measured across three distinct and quantitative pillars: Environmental, Social & Governance. The unique ESG performance assessment that underpins the FTSE ESG World Government Bond Index is designed to achieve improved ESG performance for the sovereign bond asset class utilizing innovative geometric tilts on E, S & G pillars. The ESG pillars are based on ESG factors developed as part of the Sovereign Risk Monitor (SRM) model by Beyond Ratings.
