

# FTSE Multi-Asset Infrastructure Composite Index Series

## FTSE Global Core Infrastructure Index + FTSE Fixed Income Core Infrastructure Bond Index

Multi-Asset | Single Currency

The FTSE Multi-Asset Infrastructure Composite Index Series is designed to measure cross-asset market returns for global infrastructure public securities across the capital structure. Each index is constructed as an index-level composite of at least one broad-market infrastructure equity, and one infrastructure fixed income index. Some indices also include a cash component.

Each family within the series includes a selection of weighting ratios to proxy a range of asset class allocations. Each series is produced in four weightings as standard: 75/25, 60/40, 50/50, 30/70 (Equity % / Fixed Income %). Composite index weightings are reset monthly, whilst underlying indices retain their respective rebalance schedules. Versions inclusive of cash are also available, with cash weighted at 2% as standard. Reporting is across four major currencies (USD, EUR, GBP, JPY) with cash positions, where included, held in the relevant currency at Eurodeposit rates. These indices are fully customisable on request.

### Underlying Indices

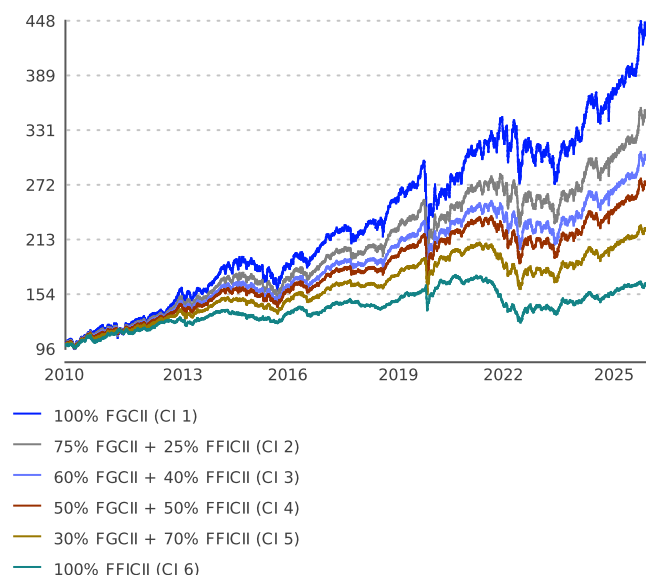

**Equity Infrastructure:** The FTSE Global Core Infrastructure Index (FGCII) is designed to measure the performance of infrastructure and infrastructure-related listed equity securities worldwide. The series offers a variety of indices including those that only cover companies involved in the FTSE Russell-defined “core” infrastructure activities as well as those that include companies involved in both core infrastructure and infrastructure-related activities. Versions with index weight caps placed at both the constituent-level and sector-level to ensure exposure remains diverse are available as well.

**Fixed Income Infrastructure:** The FTSE Fixed Income Core Infrastructure Bond Index (FFICII) is designed to reflect the performance of infrastructure debt securities issued by corporate and quasi-government issuers worldwide. The index tracks investment-grade and high-yield markets across several major currencies, diversified across the three FTSE Russell-defined “core” infrastructure sectors.

Please refer to individual factsheets or ground rules documents for the FTSE Global Core Infrastructure Index Series and FTSE Fixed Income Core Infrastructure Bond Index Series design criteria. These can be found at [lseg.com](https://lseg.com).

## PERFORMANCE STATISTICS

No member of LSEG nor their respective directors, officers, employees, partners or licensors make any representation regarding the advisability of investing in any asset or whether such investment creates any legal or compliance risks for the investor. A decision to invest in any such asset should not be made in reliance on any information herein. Indices and rates cannot be invested in directly. Inclusion of an asset in an index or rate is not a recommendation to buy, sell or hold that asset nor confirmation that any particular investor may lawfully buy, sell or hold the asset or an index or rate containing the asset. The general information contained in this publication should not be acted upon without obtaining specific legal, tax, and investment advice from a licensed professional.

Past performance is no guarantee of future results. Charts and graphs are provided for illustrative purposes only. Index and/or rate returns shown may not represent the results of the actual trading of investable assets. Certain returns shown may reflect back-tested performance. All performance presented prior to the index or rate inception date is back-tested performance. Back-tested performance is not actual performance, but is hypothetical. The back-test calculations are based on the same methodology that was in effect when the index or rate was officially launched. However, back-tested data may reflect the application of the index or rate methodology with the benefit of hindsight, and the historic calculations of an index or rate may change from month to month based on revisions to the underlying economic data used in the calculation of the index or rate.

This document may contain forward-looking assessments. These are based upon a number of assumptions concerning future conditions that ultimately may prove to be inaccurate. Such forward-looking assessments are subject to risks and uncertainties and may be affected by various factors that may cause actual results to differ materially. No member of LSEG nor their licensors assume any duty to do and do not undertake to update forward-looking assessments.
