

FTSE Multi-Asset Global Core Infrastructure Index

Multi-Sector | Multi-Currency

The FTSE Multi-Asset Global Core Infrastructure Index (MAGCII) is a comprehensive, multi-asset, multi-currency index diversified across three FTSE Russell defined infrastructure sectors. The Index is designed to reflect the performance of infrastructure equity and fixed income securities worldwide, including coverage of Developed and Emerging equity markets, as well as Investment-Grade and High-Yield fixed income markets across several major currencies, from both corporate and quasi-government issuers. The Index covers a broad array of sectors, countries and currencies, and sub-indices are available across a variety of sectorizations. The Index benefits from FTSE Russell's two step approach to defining "core" infrastructure, which considers both industry classification and revenue derived from infrastructure core activities.

The index universe for the FTSE Multi-Asset Core Infrastructure Index is comprised of the current constituents of the FTSE Global Core Infrastructure Series and the FTSE Fixed Income Core Infrastructure Index at the start of the first business day of each month. The base currency of the index series is US Dollars (USD). The Index is also published in other currencies, including EUR, GBP, and JPY.

Please refer to individual factsheets or ground rules documents on ftserussell.com for the design criteria of the FTSE Global Core Infrastructure Index Series and FTSE Fixed Income Core Infrastructure Bond Index Series.

INDEX PROFILE

Description	# of Issuers	# of Issues	Par Amount*	Market Value*	Market Weight (%)

DESIGN CRITERIA AND CALCULATION METHODOLOGY

Universe:	Equity - including both developed and emerging markets Fixed Income - multi-currency fixed-rate, investment-grade and high yield credit universe, covering corporate and quasi-government core infrastructure issuers
Defining Infrastructure:	FTSE defines infrastructure as issuers that own, manage or operate structures or networks, which are used for the processing or movement of goods, services, information/data, people, energy and necessities from one location to another. FTSE uses a two-step process to identify issuers which satisfy infrastructure related criteria. Firstly, the eligible universe is defined according to a list of eligible COBS sectors, selected to capture issuers consistent with the above definition. Secondly, proprietary research is undertaken to determine the percentage of an issuer's revenue derived from infrastructure core activities (see ground rules for the full list); these revenue percentages determine whether an issuer will be included in the core infrastructure universe.
Fixed Income	
Coupon:	Investment-Grade: Fixed-rate and fixed-to-floating rate bonds. High-Yield: Fixed rate and fixed-to-floating rate cash-pay bonds, Zero-to-Full (ZTF), Pay-in-Kind (PIK), step-coupon bonds
Minimum Maturity:	At least one year
Minimum Issue Size:	Investment-Grade: AUD 250 million (Semi-Gov) / AUD 100 million (Corporate), EUR 500 million, GBP 300 million, JPY 50 billion, USD 500 million High-Yield: CHF 100 million, EUR 200 million, GBP 150 million, USD 250 million
Minimum Quality:	Minimum C by S&P and Ca by Moody's (excludes defaulted bonds)
Weighting:	Market capitalization
Pricing:	Investment-Grade: Refinitiv High-Yield: Interactive Data (USD bonds) and Refinitiv (non-USD bonds)
Reinvestment of cash flows:	Intra-month cash flows from interest and principal payments are not reinvested as part of monthly index total return calculations.
Equity	
Investability Screen	Actual free float applied and liquidity screened
Rebalancing:	Once a month at month end
Calculation Frequency:	Daily
Settlement Date:	Monthly – Settlement is on the last calendar day of the month. Daily – Same day settlement except if the last business day of the month is not the last calendar day of the month; then, settlement is on the last calendar day of the month.
Base Date:	July 31, 2011
