4.3 Index Ratings

4.3.1 Bonds must have an index rating of at least A in order to be eligible for the index.

⁵ Effective 23 January 2023, Original Term to Maturity means from settlement date to maturity date.

⁶ The CORRA Index data used to calculate the coupon of Floating Rate Note is sourced from the Bank of Canada. This data are sourced from the Bank of Canada website and is available free of charge. CORRA-linked floating rate notes were added to the index on 26 September 2022.

⁷ This includes, but is not limited to, securities with coupon types referred to as Fixed-to-Float, Fixed-to-Fixed and Fixed-to-Resetable.

- 4.3.2 The index rating for each bond is based on the publicly available ratings from Dominion Bond Rating Service, Standard and Poor's, Moody's Investors Service and Fitch. In cases where the agencies do not agree on the credit rating, the index rating will be classified according to the following rules:
- If two agencies rate a security, use the lower of the two ratings;
 - If three agencies rate a security, use the middle of the three ratings;
 - If four agencies rate a security, use the middle of the three lowest ratings

Thus, the ratings A+, A-, and A are viewed as equivalent for the purposes of the index.
- 4.3.4 The index does not take into account a rating agency's outlook for a credit rating, or whether a particular rating may be under review by an agency.
